

# STATIC PULVERISERS

Designed for primary demolition, secondary concrete reduction and material processing.

## STATIC PULVERISERS SPECIFICATIONS

Item	Unit	SM350	SM1000	SM2500	SM4000
Excavator weight	T	6-9	10-18	18-25	30-45
Tool Weight	KG	620	1050	1750	2750
Length	MM	1520	1898	2065	2750
Height	MM	905	1162	1315	1705
Jaw Opening	MM	520	700	890	1050
Cylinder Force	T	70	100	145	157
Oil Flow	L/MIN	40-60	100-180	180-220	220-280
Pressure	BAR	240	280-320	280-320	280-320

- Our static pulverisers have been designed to make easy work of material processing and reinforced steel separation. Perfect for use at ground level, they allow for the demolition of boundary walls and vertically reinforced concretes structures.
- Weight Range from 5T - 45T.
- Specifically designed to withstand high levels of pressure, wear and abrasion, and prolonged use regardless of the conditions.

### Applications:

- Primary and secondary demolition.
- Concrete pulverising and recycling.
- Material processing and separation.
